Towards the end of the model year the 396 cid engine was increased to 402 cid. Rumors abound for the reason of the 402 cid existence. One is that Tonawanda has a lot of bare blocks rusting away and decided to bore them +0.030 to clean them up. GM wouldn't do this. 1969 Chevelle Engine Photos & 396 cid Engine Production

This filter kit includes a 3" paper air filter

In 1956, the oil filter used on a V8 engine was changed from a remote type oil filter that was mounted on the intake manifold to a block mounted oil filter down low at the rear of the engine. This was a far superior design to 1955 as the oil was filtered before it ever went through the engine and there were no external oil hoses to leak. In

Distributor Vacuum Advance Control units Specs and facts for GM Point-Style Distributors by Lars Grimsrud When the load on the engine is light or moderate, the timing can be advanced to improve fuel economy and throttle response.
